1/●-	Hatch closed
2/○●	Cabin shorter than cargo bed, hatch closed.
3/●-	Cabin over the hatch, hatch opened.
x	Not Suitable

*The main difference between the Gladiator SH and SE models is their cabin width, despite having the same length. The Gladiator SH model is produced without a bathroom, while the SE model includes bathroom. When choosing between the SH or SE models, be sure to check the measurements of the vehicle's wheelhouse with the cabin's wheelhouse.

Before purchasing the product, please compare technically the dimensions on the website with your existing pick-up vehicle's bed size and make sure that the cabin would be suitable for the vehicle.

***For the Jeep model, the cabin will be custom-manufactured with dimensions different from the standard specifications. Therefore, the relevant preferences and configurations must be communicated to us in advance.

When calculating the standard cabin dimensions, any optional parts or add-ons in the bed of pick-up vehicle, which are added/assembled later at the factory, are not taken into account. Please take this into consideration.

Vehicle manufacturers may change cabin dimensions without notice.

As pickup beds vary by brand and model, proper securing of the cabin and the use of protective measures at contact points are recommended to ensure long-term comfort and vehicle protection.
